

Scottish Campaign on Welfare Reform

Dear Mr Nic

About your Income Support

I am writing to tell you the rates of Social Security
e way this has been worked out is shown on the page
worked out.

Dear MP

I understand that the Government wants to change welfare benefits. People should be valued whether they are in work or not. I would like to see better support for people who can work and more money to live on for people who cannot.

I am worried that the changes will not give people support to find and stay in work. Threatening to cut their benefits will be unhelpful for some of Scotland's poorest people. Benefit levels are too low, especially if people have hidden costs to meet. I want the Government to make more jobs available to people on benefits.

I am asking you as my MP not to support any changes that will threaten to take benefits off people. Please support rises in benefit levels for people who cannot work and make sure that people who need a lot of support to work, get it.
